

# INDEX

## A.

Abdomen and intestines, penetrating wound of, 382.  
 Abortions, Meigs on cranial form, 402.  
 Abortion, criminal, 262.  
 Abscesses: scrofulous, 143, 200; of the lachrymal sac, 230; of abdominal wall, 280; chronic, 415.  
 Acid, nitro-muriatic and strychnia in cerebro-spinal meningitis, 218.  
 Aconite, internal use of, 258.  
 Actual cautery in treatment of pedicle of ovarian tumor, 439.  
 Adulteration of arrow-root, 207.  
 Age: comparative of men and women in England, 207; lecture on as an influence in modifying disease, 369.  
 Ague: treatment of, 444; and fever, 528.  
 Albuminuria: idopathic, differential diagnosis of, 161; diagnosis between nervo-idopathic and renal, 239.  
 Alcohol, increased consumption of, and injury caused by, 227.  
 Amblyopia, amaurosis and extraction of cataract, 209.  
 Amenorrhoea, caused by exposure to cold, 70.  
 Amputations, remarks on, 409.  
 Anemia: with menorrhagia, 72; transfusion in, 255; general oedema from, 410.  
 Anesthesia, local, 595.  
 Anesthetics, 56; chimogene, a new, 129.  
 Anal ulceration and fistule, 458.  
 Anatomy, Philadelphia School of, 384.  
 Anchylosis of knee-joint, 161.  
 Ancient creature, 32.  
 Angina pectoris, 474.  
 Aneurism of arch of aorta, 337.  
 "A new anatomical fact," 384.  
 Ani prolapsus, 135.  
 Ankle-joint, a new operation at, 396.  
 Aorta, aneurism of arch, 337.  
 Aphasia, 269; with hemiplegia of right side, 161.  
 Aphides, reproduction of, 326.  
 Aphonia, 148.  
 Apparatus for nebulisation, 38, 60.  
 Army, information for entering medical corps of, 187.  
 Army itch, a chapter on, 104.  
 Arrow-root, adulteration of, 207.  
 Arsenical ointment, poisoning by, 468.  
 Arteries, Hunterian ligation, to prevent destructive inflammation of, 259.  
 Artery, iliac, successful ligation of, 340.  
 "trachea and median nerve, wound of, 432.  
 Ascaris, lumbricoides, in trachea, 51.  
 Astograph, 531.  
 Atmospheric conditions, influence of on typhus, 72.  
 Atropine, effects from local use of, 300.  
 Autopsies, how to make them oilous, 326.

## B.

Bakus, a new expectorant, 126.  
 Belladonna, an antidote for opium, 225.  
 BENTHAM, JEREMY, body of, 407.  
 Biographical Sketches of Living New York Physicians: Martyn Paine, 63; J. W. Draper, 96; John H. Griscom, 118; B. F. Barker, 156; E. Brown-Séquard, 169; James Anderson, 215; F. Campbell Stewart, 240; A. K. Gardner, 313; Isaac E. Taylor, 336; Isaac Wood, 454; Edward Delafield, 509.  
 Birth, triple, 111, 181.  
 "Black Death," 147.  
 Bladder, female, piercer removed from, 395.  
 Blanching of the hair, 267.  
 Bleeding, a victim to, 27.  
 Bone, regeneration of, 439.  
 Borax, virtues of, 236.  
 BRAINARD, D., death of, 366.  
 Brain work in Germany, 325.  
 "anomalous condition of ventricles of, 450.  
 Bran flour, prepared, 424.  
 Bright's disease, 354; acute, with uræmia, 29.  
 Buchu, fluid extract of, 401.  
 Bullets, searching for, 418.  
 Burns, treatment of, 260.

## C.

Cæsarian section, and anomalies in pregnancy, 291.  
 Cardiac disease, remarkable case of, 413.  
 Camp diarrhoea, 82.

Cancer: of the stomach, 93; epithelial, 99; of oesophagus, 177; mammary, 339; of liver, 405; epithelial of cervix uteri, mode of treating, 486; of stomach, 495; epithelial of cervix, new mode of treating, 536.

Capsicum in delirium tremens, 101.

Carbolic acid, 126, 508.

Carbonic oxide, poisoning by, successful treatment by transfusion of blood, 73.

Carcinoma uteri, 100.

Catalepsy, partial, with hysteria, 117.

Catalogue priced, 485.

Cataract, 235, 458; extraction of, 209; soft, extraction by suction, 213.

Caustic, a new, 435.

Cerebral embolism, 299.

Cerebro-spinal meningitis, 141, 147; differential diagnosis of, and typhus, 506.

Chamber-vessel, Bankin's, 384.

Chilblain, 167.

Chimogene, a new anæsthetic, 129.

Chloroform, 126; and ergot, 127; internal use of, in delirium tremens, 133, 226, 406, 445; in sporadic cholera, 158; internal use of, 284, 519; in milk, 417.

Chlorodyne, 418.

Cholera: Asiatic, 14, 147, 181, 223, 243, 284, 285, 367; New York Academy on, 54—and sanitary measures, 55; in Altenburg, 56;—literature, 78; progress of, 79; in New York and Brooklyn, 80; first case in New York, in 1866, 94; progress of, 107, 124; and sanitary police of New York, 125; not contagious, 148; treatment of, 150; progress of, 163; new work on, 164; on the Mississippi, 179; subcutaneous injections in, 180; conference at Constantinople, 182; in Savannah, 187; progress of, 202; spontaneous origin of, 205; mist, 207; history of a case, 226; Gasson's treatment for, 239; dilute sulphuric acid as a prophylactic in, 239; in Iowa, 244; British Commissioners to Conference, 244; portability and quarantine, 263; sporadic case, 264; in Italy, 287; death of M. Gilbert and Chausier, 287; contagiousness of, 427; some remarks on, 429; guano as a remedy, 447; and contagion, 535; in Kansas City, Mo., 539.  
 Chorea; how shall I treat it? 179, 223, 242, 286, 345.

Clavicle, fracture of, 362.

Cleatrix, operation without, 175.

"Clean shave," 167.

Club-foot, 8.

Cod-liver oil, 423.

Coffee, utility of, in soldier's diet, 438.

Colleges: Maine, 54; Phila. Dental, 165; Agricultural, 327; of phys. and surgeons, Kingston, Canada, 242.

Collodion, mercurial, to remove discolored syphilitic patches, 239.

Compliments, post-mortem, 498.

Complaint, a well founded one, 25.

Congress: international medical, at Paris, 77; of social science 424.

Conjunctivitis, granular, 362.

Contagion, 529.

Copenhagen, letter from, 224.

Corpus callosum, deficiency of, 340.

Corrosive sublimate, poisoning by, 429.

Copper, chloride of, medical uses, 364.

Coxalgia, 236.

Coxarius morbus, successful excision of head and neck of femur of, 502.

Croup: tracheotomy in, 401; inhalation of lime water in, 527.

Crystals, dumb-bell, origin of, 200.

## D.

Dacryocystitis, 265.

Dead apparently, means for restoring, 206.

Death: from fear, 267, by battle and disease, 286; hour of, 305.

Delirium tremens, 386; capsicum in, 101; internal use of chloroform in, 133, 226, 406, 445; digitalis and bromide of potassium in, 258.

Delivery, case of forceps, 389.

Deltoid muscle, artificial treatment for luxation of the scapular extremity of clavicle, 257.

Deodorizer and disinfectant: Thompson's, 146; Baker's, 207.

Diabetes, citrate of soda in, 401.

 EMPEROR L. NAPOLEON, illness of, 383.  
 Empyema, differential diagnosis of, 322.  
 Encephaloid disease of thigh, 98.  
 Epilepsy: treated by bromide of potassium, 253; unilateral sweating in, 420.  
 Epileptics, hospital for, 443.  
 Epithelial cancer: of uterine neck, 98; of cervix uteri, 456.  
 Epithelioma: at unusual age, 321; result of operation, 338; of both lips, 339.  
 Epulis, 235, 379.  
 Ergot and chloroform, 127.  
 Erythema, 497.  
 Erysipelas, iodide of potassium for, 462.  
 Ether spray in reduction of hernia, 482, 521.  
 Etiology of epidemics—prize offered, 304.  
 Evil, the social, 204.  
 Evolution, spontaneous, 386.  
 Exchanges, literary, 105.  
 Expectorant, bakua, a new, 120.  
 Excision, successful of head and neck of femur in morbus coxarius, 502.  
 Eye and ear, strumous disease of, 143.  
 Eyes: fracture of lens and anterior capsules in hanging, 341; weak, 446.

## F.

Face, plastic operation on, 460.  
 Faeces, impacted in pouch of rectum, 161.  
 Families in France, diminution of, 485.  
 Fat, in animal body, source of, 346.  
 Female sex, where it prevails (French), 151.  
 Femur: luxation of, into the foramen ovale—manipulation v. pulleys, 316; successful excision of head and neck for morbus coxarius, 502.  
 Fever: puerperal, 9, 285; typhus and typhoid, 146; and ozone, 147; spotted, 195, 426, 486; nitro-muriatic acid and strychnia in, 218; eruptive, coincidence of, 323; mixed, 367, 425; varieties, 486; differential diagnosis of typhus and cerebro-spinal meningitis, 503; and ague, 528.  
 Fibula, necrosis of, 98.  
 Filter, poor man's, 261.  
 Finger: nevus metatarsal on, 459; supernumerary, 507.  
 Fistula: vesico vaginal, history and treatment, 1, 73, 57, 115, 151, 190, 272, 309, 373, 391, 413, 478; anal, in tuberculous patient, 199; and anal ulceration, 458.  
 Flatulency, 178.  
 Foetus: retained in utero 43 years, 16; dead, carried two months, 127; extraordinary viability of, 150; respiration, etc., at five months, 344; carried 13 months; dead nine months, 467; punctured wound of, in uterus, 502.  
 Forceps; delivery by, 220, 222, 389.  
 Foreign substances, long continued presence of, 68.  
 Foot, gunshot wound of, 363.  
 Fracture: of skull, 44; of inferior maxilla—compound of tibia 67; of clavicle, 362, 534.  
 Fundus oculi, 307.

## G.

Ganglions lymphatic, scirrhus of, 256.  
 Gas, explosion in physician's office, 246.  
 Gasson's treatment for cholera, 239.  
 Gastrotomy successfully performed in ruptured uterus, 160.  
 Glycerine, use of, 482.  
 GREVILLE, R. K., M. D., notice of death, 111.  
 Guaco, a remedy for cholera, 447.  
 Guillotine, inventor of, 27.

## H.

Hair: bleaching of, 267; hypertrophy of scalp, etc., 459.  
 Hare-lip, 460, 498.  
 HARVEY, W. H., notice of death, 54.  
 Health: Metropolitan Board of, and Academy of Medicine, 22; effect of rain on, 206; public—comparison of, in cities, 446.  
 Heart: action of, 464; gunshot wound of, 502.  
 Heart's contraction, nature of, 401.  
 Hemiplegia: of right side, with aphasia, 161; hysterical, 278.  
 Hemorrhage, concealed uterine, during pregnancy, 536.  
 Hernia: operation for radical cure of, 319; comparative frequency of varieties of—ventral, cured by subcutaneous incision, 481; ether spray in strangulated, 482; ether spray in reduction of, 521.  
 Hip-joint: contusion of, 144; successful amputation of, 259; dislocation of, 305.  
 Homoeopathy, practical, 130.

## HOSPITAL REPORTS:

## Jefferson Medical College:

Case of club-foot—tuberculosis of knee-joint, 8.  
 Syphilis of the osseous system, 42; pilous sebaceous tumor—necrosis—onychia maligna, 43.  
 Long continued presence of foreign substances—tumor, 68; strabismus—necrosis of thigh-bone—torticolis, 69.  
 Necrosis of fibula—encephaloid disease of thigh, 98.  
 Strumous disease of eye and ear—scrofulous abscesses, 143; contusion of hip-joint, 144.  
 Ectropion of both eyelids—chilblain, 160; partial anchylosis of knee-joint, 161.  
 No cicatrix from operation—nevus, 175.  
 Anal fistula in tuberculous patient, 199; fatty tumor—scrofulous abscesses, 200.  
 Ozena—epulis—cataract, 235; abscess of lachrymal sac—ulcers of lip—coxalgia, 236.  
 Scirrhus of lymphatic ganglion, 256.  
 Symmetrical scleroma and macule—syphilitic periostitis—remarkable curvature of spine, 279; abscess of abdominal wall—enlargement of the spleen, 280.  
 Fatty tumor in an uncommon situation—anchylosis of knee-joint—encephaloid tumor of thigh, 298; malformation of nasal septum, 299.  
 Epithelioma at an unusual age—eversion of mucous membrane of upper lip, 321.  
 Result of operation for epithelioma, 338; epithelioma of both lips—mammary cancer, 339.  
 Wart-like excrescence on tongue—epulis—hypertrophy of tonsils, 379.  
 Hydrorachitis—operation for lithotomy, 397.  
 Primary syphilis—chronic abscesses, 415; Pott's disease of spine—paraplegia, 416.  
 Necrosis of temporal bone—effects of rhinoplastic operation—mammary tumor of doubtful character, 437.

Cataract—anal ulceration and fistule, 458; nevus materni on finger—hypertrophy of hair and scalp, 459.  
 Ranula, 479; large sebaceous tumor in an unusual place—hereditary syphilis, 480.  
 Lithotomy—congenital pilous tumor over the patella—lymphatic enlargement—whitlow—erythema, 497; hare-lip 498.  
 Syphilitic ulcer; carcinomatous tumor on arm, 533; incomplete fracture of clavicle, 534.

### *Long Island College Hospital:*

Menstrual derangements, 69; emansio mensium, 70; amenorrhea caused by exposure to cold, 70; menorrhagia from plethora, 71; menorrhagia with anemia, 72.  
 Menorrhagia following miscarriage, 98; malignant disease of uterus, 99; carcinoma uteri, 100.  
 Abnormal labor requiring forceps delivery, 220; inertia of uterus—instrumental delivery, 221; difficult labor—labor in case with congenital narrowing of vulva, 222.  
 Ovarian dropsy—tuberculosis involving right ovary, 237.

### *Pennsylvania Hospital:*

Fracture of inferior maxilla—compound fracture of tibia, 67; detachment of tendon of patella—incised wound of the neck, 68.  
 Operation for radical cure of hernia, 319.  
 Pathological specimens, 361; fracture of clavicle—granular conjunctivitis, 362; phymosis—gunshot wound of foot—amputation, 363.  
 Human race degenerating in our cities, 306.  
 " species, unity of, 507.  
 Humerus, dislocation of, 526.  
 Hydrogen, peroxide of, 130.  
 Hydrocele, 73.  
 Hydrorachitis, 397.  
 Hypertrophy of the hair and scalp, 459.  
 Hypodermic injections, 461; in extreme irritability of stomach, 206; the dangers of, 519.  
 Hyposphilitis in diphtheria, 341.  
 Hysteria, with partial catalepsy, 117.  
 Hysterical delirium, 149; hemiplegia, 278.

### I.

Idiots, training of, 56.  
 Incus and stapes, disconnection of; effects upon hearing, 72.  
 Indium, 540.  
 Inebriates, care of, 78.  
 Infants, new born, dressing of, 265.  
 Infected ports, what constitutes, 204.  
 Infirmary, eye and ear, Chicago, 204.  
 Injections: subcutaneous, in cholera, 180; in extreme irritability of stomach, 206; hypodermic, 461; dangers of, 519.  
 Injunctions, 77.  
 Injustice, 127.  
 Insane: in public service, provision for, 110; hospital for, in Connecticut, 423.  
 Insects, value of, 488.  
 International Medical Congress at Paris, 77.  
 Intestinal dejection of starch, 504.  
 Intestines, penetrating wound of abdomen, and, 582.  
 Iodide of potassium: action increased by ammonia, 339; in erysipelas, 462.  
 Iodine, a new test for, 508.  
 Iron treatment, 507.  
 Iron, chloride of, in spinal meningitis, 81.  
 Itch, 131; camp, 286.

### J.

Journals, new, 80.

### K.

KAVANAGH, ARTHUR, 407.  
 Knee joint: tuberculosis of, 8; partial ankylosis of, 161; ankylosis of, 298; excision of, 405.

### L.

Labium, tumor of, 502.  
 Labor: value of uterine agents in—discussion, 44; abnormal, forceps delivery, 220, 221, 222; premature—remarkable case of, 526.  
 Lancet, a plea for, 480.  
 Laryngoscopy, lecture on the use of, 349.  
 Laryngoscopy, and its uses, 350, 417.  
 Laudanum, poisoning by, 420.  
 Legislation, advancement of science by means of, 539.  
 Lens, crystalline, structure of, 239.  
 Limbs, artificial, 167, 227, 367.  
 Lime inhalations in diphtheria, 26, 77.  
 Lime water in croup, 527.  
 Lip: ulcers of, 236; upper, epithelioma—mucons membrane, eversion of, 321; result of operation, 338; of both lips, 330.  
 Liquid glass, surgical uses of, 52.  
 Lithopædion, 4.  
 Lithotomy: operation for, 397; results, 497.  
 Liver: fatty degeneration of, 289; cancer of, 405.  
 Lunatic asylums, 43; patients in Scotland, 110.

Lymphatic: ganglions, scirrhus of, 256; enlargement of ear, 497.

### M.

Malformation of mouth, nose, and palate, at birth, 506.  
 Malpractice, 303; and its legal relations, 445.  
 Mammary: cancer, 339; tumor of doubtful character, 437.  
 Manipulation versus pulleys—luxation of femur, 316.  
 Manslaughter, 131.  
 Massachusetts, vital statistics of, 383, 403, 443.  
 Maxilla, inferior, fracture of, 67.  
 Meat: preservation of, 82; paraffine for preserving, 407.  
 Medical: statistics, new work forthcoming, 80; fragments, 88; education, 162, 203, 243, 262; act, amendment to, 189; service, British and American compared, 181; societies, formation of, 241; practical teaching, 263; science, state of, 282; discussions in newspapers, 284; observations in Asia, 302; Journal Association in New York, 327; prescription through Atlantic cable—practitioners in Great Britain—Congress in Paris, 465; Record, 467; International Congress, 484; officers in British Army and Navy, 107; salaries of Irish officers, 180; uses of chloride of copper, 364.

### MEDICAL SOCIETIES:

#### *Academy of Medicine, New York:*

Discussion on chronic metritis, 498, 516, 534.

Cumberland co., Pa., 109.  
 Cumberland co., N. J., 423.  
 Harford co., Md., 438.  
 Iowa, State, Annual Meeting, 16.

#### *Newark (N. J.) Medical Association:*

Fracture of skull—death from concussion—stricture of oesophagus—death—choleraic diarrhoea—discussion on value of uterine agents in labor, 44.  
 New York co., 405.

#### *New York Medical Journal Association:*

Plastic surgery, 459; hare lip—plastic operations for deformity of face, 460.  
 Omaha, Nebraska, 507.

#### *Pathological Society, New York:*

Extensive tuberculosis in a child, 501; morbus coxarius—successful excision of head and neck of femur—tumor of labium magus—gunshot wound of heart—necrosis of skull, 502.

Pennsylvania, State, Minutes of 17th Annual Session, 47.

#### *Philadelphia County:*

Discussion on puerperal fever, 9; laryngoscopy, its uses in diseases of throat and windpipe, 380, 417.

#### *Vermont State Society:*

Minutes of Semi-Annual Session—dysentery, 12; scarlatina—cholera, 14; Minutes of Fifty-second Annual Session, 398.  
 Medicine: and politics, 233; practical, 446.  
 Meningitis: spinal, tinct. chloride of iron in, 81; cerebro-spinal, 141; do., nitro-muriatic acid and strychnia in, 218.  
 Menorrhagia: from plethora, 74; following miscarriage, 98; quinia in, 323.  
 Menstrual derangements, 69.  
 Menstruation: scanty, with anemia, 69; in pregnancy, 300; precocious, 274, 526.  
 Mercurial: non, treatment in syphilis, 418; collodion, for syphilitic patches, 239.  
 Meteorology, 28, 56, 84, 112, 131, 162, 168, 188, 203, 228, 248, 275, 288, 308, 328, 348, 368, 388, 408, 428, 448, 468, 488, 508, 528, 540.  
 Meteors, 37.  
 Metric system, 12, 308.  
 Microscope: photography applied to, 21; a powerful, 327.  
 Military surgeons, Italian, 131.  
 " asylums, U. S., 166.  
 Milk, chloroform in, 407.  
 Miscarriage, followed by menorrhagia, 98.  
 Missed labor, remarkable case—retention of fetus fifteen years, 16.  
 Mist, cholera, 207.  
 Mortality of Providence, R. I., 324.  
 Mouth, diseases of, 85, 113, 270.  
 " piece, improved, for administering nitro-oxyl gas, 389.  
 Muscle, artificial deltoid, treatment for luxation of the scapular extremity of clavicle, 257.  
 Muscles, trunkal, physiological and pathological relations, with the therapeutic indications involved, 4, 35, 90, 136, 172, 232, 275, 291, 332, 375, 513.  
 Muscular work and heat, 267.  
 mutilation by savages, 468.

N.

Narcaine, physiological action of, 239.  
Nasal septum, malformation of, 299.  
Nashville, University of, 227.  
Navy and army, changes in, 27, 56, 83, 111, 131, 151, 167, 188, 208, 227, 247, 267, 287, 307, 327, 347, 387, 427, 447, 468, 508, 528.  
Neck, incised wound of, 68.  
Necrosis, 43; of thigh-bone, 69; phosphor, 85, 113; of fibula, 98; of temporal bone, 437; of skull, 502.  
Nevus, 175; maternal on finger, 459.  
Newport, R. I.—Is there a healthier place? 467.  
Nitro-glycerine, another explosion, 27.  
Nostrums, 382.  
Nuisance, human, 392.

O.

OBITUARIES:

Reuben Dimond Mussey, M. D., LL.D., 75; J. Theodore Calhoun, M. D., 166; Joseph Toynbee, F. R. S., 128; A. A. Gould, 268; R. W. Gibbs, 368; C. S. Tripler, U. S. A., 408; W. B. Ewing, 428; Daniel Brainard, 448.  
Obscure disease, 122.  
Oesophagus: foreign substances in trachea and—cancer of, in upper part, 177.  
Oil, cod-liver, tasteless, 423, 469.  
Oleum morrhuae, 469.  
Onychia maligna, 43.  
Operation, without cicatrix, 175.  
Ophthalmic surgery, 423.  
Ophthalmological society, American, 109.  
Ophthalmoscope, clinical use of, 411.  
Opium: American, cultivation of, 79; adulteration of, 187; bel-ladonna, antidote for, 225.  
Organic remains, 468.  
Orthography, specimen of, 445.  
Os uteri, mechanical dilation, and placenta prævia, 295.  
Ovary, tuberculosis involving, 237.  
Ovarian: dropsy, 237; tumor—treatment of pedicle by actual cautery, 439.  
Ovariectomy, 131, 259, 281, 494; on, dealing with the pedicle in, 480.  
OWEN, Professor, 27.  
Oxide, carbonic, poisoning by, and successful transfusion of blood, 73.  
Oxygen, preparation of, 488.  
Ozæna, 235.  
Ozone, and typhus fever, 147, 488.

P.

Paraffine for preserving meat, 507.  
Paraplegia, 416.  
Paris Exposition, 77, 443.  
Patella: detachment of tendon, 68; fracture of by muscular action, 451; congenital pilous tumor of, 497.  
Pathological specimens, 361.  
Pelvis, fracture from gunshot wound, 433.  
Pepsin, syrup of, with bitter orange, 167.  
Per-oxide of hydrogen, 130.  
Pessary, new medicated, 147.  
Petroleum in prurigo, 201.  
Pharmaceutical Association, American, 247.  
Pharmacopœia, new French, 447.  
Phlebitis, after gunshot wound, 452.  
Phosphor-necrosis, 85.  
Photography, applied to the microscope, 21.  
Physicians: dishonorable conduct in, 263; visiting list, 240; privileges, 466.  
Physiological and pathological relations of the trunkal muscles, with the therapeutic indications involved, 4, 38, 90, 136, 172, 232, 275, 291, 332, 375, 513, 531.  
Physiology: of Todd and Bowman, 147; experimental, 522; and hygiene, 498.  
Piercer, 2¼ inches long, removed from a female bladder, 295.  
Placenta prævia, 189; and mechanical dilation of the os uteri, 295.  
Plastic operation for deformity of the face, 460.  
Pleuritic effusion, 430.  
Pneumonia, with pleurisy, 219.  
Poisoning, 166; by carbonic oxide, 78; by laudanum—corrosive sublimate, 420; by arsenical ointment, 468.  
Politics and medicine, 283.  
Polyesians and their migrations, 507.  
Poor, the, 422.  
Poor law commissioners, 181.  
Poor man's filter, 267.  
Potash, nitrate of, in intermittent fever, 340.  
Potassium: bromide, in delirium tremens, 258; in epilepsy, 253; in sleeplessness after uterine irritation, 341; iodide of, in erysipelas, 462.  
Pregnancy: anomalies of, Cæsarian section, 204; menstruation in, 300.  
Prizes, French Government, 27, 447.  
Prolapsus ani, 135.  
Prurigo, oil of petroleum in, 201.

Q.

Quacks, ignorance of, 345.  
Quackery: specimen of British, 422; in the profession, 466.  
Quarantine: of U. S. vessels at Havana, 206; proposed permanent at New York, 266; officers at Fortress Monroe, 267.  
"Quassia the Quack," 326.  
Quinine: chlorate of, 147; in menorrhagia, 323; in treatment of tetanus, 473.

R.

Ranula, 479.  
Rain, effects on health, 206.  
Record, Medical, 467.  
Rectum, impacted feces in pouch of, 161.  
Remains, organic, 468.  
Resuscitation from effects of chloroform, 131.  
Rheadine, a new alkaloid, 488.  
Rhino-plastic operation, effects of, 437.

 Trichiniasis, 525; fifteen cases of, 41; in Iowa, 82.  
 Triplets, cases of, 111, 131.  
 Tubercle, virus of, 247.  
 Tuberculosis: of knee-joint, 8; pulmonary, 8; in a child, 501; involving right ovary, 237.  
 Tumor: pilous, sebaceous, 43; sebaceous, 68; fatty, 200; scrofulous, 143, 200; fatty, in uncommon situation—encephaloid of thigh, 298; mammary, 339; double ovarian—mammary of doubtful character, 437; sebaceous, 480; congenital pilous, over patella, 497; of labium magus, 502; carcinomatous, 533.  
 Twins, one placenta, one cord, and one set of membranes, 24.  
 Typhus fever, atmospheric conditions influencing the prevalence of, 73.

## U.

Ulcer of lip, 236.  
 " syphilitic, 533.  
 Umbilical cocoon in a human subject, 142.  
 Unilateral sweating in epilepsy, 420.  
 University: of New York, 110; of Vermont, 160; Harvard, 165; Willamette, Oregon, 485.  
 Urea, crystallization of, 167.  
 Uremia, with Bright's disease, 29.  
 Urticaria, treatment of, 420.  
 Uteri: carcinoma, 100; procerdentia, 426.  
 Uterus: displacements of (see muscles, trunkal); malignant disease of, 99; rupture of, 149; laceration of, 176; inertia of, instrumental delivery, 221; retroflexion of, three years' standing, 254, 269; foreign body in, producing obstinate vomiting, 323; inversion after delivery, 339; hour-glass contraction of, 453; inversion, of three months' duration, replaced, 315.

## V.

Vaccination, 244.  
 Vaccine virus, preservation of, 240, 307, 385.  
 Value of uterine agents in labor, 44.  
 Veratrum viride, physiological properties and therapeutical action of, 258.  
 Vesico-vaginal fistula, history and treatment, 1, 33, 57, 115, 151, 190, 272, 309, 329, 373, 391, 413, 478.  
 Vinegar, to detect sulphuric acid in, 487.  
 Vis medicatrix v. drugs, 436.  
 Vision, defective and impaired, 411.  
 Vomiting, obstinate case connected with foreign body in uterus, 323.  
 Vulva, labor in case of congenital narrowing of, 222.

## W.

War, glorious, 346.  
 Wart-like excrescence on tongue, 379.  
 Weather, hottest for the century, 110.  
 Weights, and measures, metric, 12.  
 What we have done since July, 366.  
 Wife of John Michaels, 111.  
 Whitlow, 497.  
 Women and lightning, 9.  
 Wonders, age of, 307.  
 Workhouse hospitals in London, 180.  
 Wound: incised of neck, 68; chloride of sodium in treatment of, 190; gunshot of foot, amputation, 363; common salt for, 401; gunshot of heart, 502.

## INDEX OF CONTRIBUTORS.

Adolphus, Jos.:

Spotted fever, 293; digitalis and its uses, 393; oleum morrhuae, 469.

Agnew, D. Hays:

Vesico-vaginal fistula, 1, 33, 57, 115, 151, 190, 272, 309, 329, 373, 391, 413, 478; surgical clinics, (see Pennsylvania Hospital); radical cure of hernia, 319.

Ancrum, J. L.:

Twins, one placenta, two cords, and one set of membranes, 149.

Atkinson, W. B.:
